

FIREHOUSE BEAUTIFICATION PROJECT

River des Peres Watershed Coalition was awarded Missouri Department of Conservation Community Stewardship Grants between 2009 and 2014. These grant helped us restore habitat on two sites including Deer Creek Park in Maplewood and Mona Terrace in University City. This map shows the **Firehouse Beautification Project** which is not only a part of that grant, but it is part of U. City's effort to meet **America In Bloom** criteria. In addition to replacing invasive weeds with native plant material, we also installed two Rain Gardens as a project with Crossroads College Preparatory School students (freshmen through seniors) and the City of University City. **Partners include Missouri Department of Conservation, University City In Bloom (gardening and city beautification), Missouri Master Naturalists, and Crossroads College Preparatory School .**
