Sandstone or Granite	\$299		
(see reverse for colors)		Grand Total	

Please make checks payable to "River des Peres Watershed Coalition" and enter "Rain Barrel" in the memo line.

<p>Return this form, with check to:</p> <p style="text-align: center;">River des Peres Watershed Coalition 152267: University City, MO 63130</p>	<p>If you have questions, please contact:</p> <p style="text-align: center;">Eric Karch, Chair River des Peres Watershed Coalition 314-603-8834 www.riverdesperes.org</p>
--	--

The RdPWC RiverSafe Rain Barrel program is set up as a pre-order, whereby we collect money for barrel orders and make a bulk order in increments of 24 barrels. Shipping time varies, as the barrels are produced in Ontario but we expect 3-5 weeks. Once we receive the barrels, we contact customers to arrange pickup from our office.

I would like to be added to the RdPWC e-mail list to receive a seasonal newsletter and event notices.

We would like to map the locations of rain barrels, which will allow us to calculate the cumulative effect of the Rain Barrel Initiative on the River des Peres Watershed. Our rain barrel mapping will only show the general location of rain barrels; it will not include your name, address, or contact information.

No, please don't show the general location of my rain barrel.

The River des Peres Watershed Coalition is not liable for damages or injuries incurred through improper installation and use of rain barrels. Refer to Riversafe Rain Barrel Installation Guide for instructions on how to safely install your barrel.

RiverSafe RainBarrel

The **RiverSafe** RainBarrel is easy to install, maintain and is suitable for almost any property size or location

The easy way to harvest rainwater at home!

Use a RiverSafe RainBarrel to:

- Stop stormwater from running off your property
- Water your garden with chlorine-free rainwater
- Conserve potable water and save money
- Reduce energy used to treat and pump municipal water
- Help restore the natural water cycle in the city

A 500sqft roof (46m²) can collect as much as 460L (121G) of useable water during a standard rain fall !
Making our barrel the perfect size.

Stormwater picks up pollutants and debris as it runs-off your roof, sidewalk and driveway, carrying them to our streams, rivers and lakes.

Protect our waterways by keeping rainwater on your property with a RiverSafe RainBarrel

Available in:

		Green	Black (100% Recycled)
		Sandstone	Granite
\$249	\$299		

- 500 litre (132 US gallon) capacity - one of the largest on the market
- UV-stabilized HDPE plastic resists fading, warping and cracks
- Integrated diverter valve: winter maintenance at the turn of a dial, overflow directed away from the house
- Two-stage filter system: leaf filter catches debris, 200-micron mesh prevents sediment build up and is mosquito proof
- One-piece closed design is animal and child proof
- Two drain options for brass valve provides easy access to water
- 51" high, 27 1/4" in diameter

All barrels include an installation and maintenance guide and all parts are guaranteed with a one-year warranty!

Designed and manufactured in Canada.

All Proceeds fund Riversides' community programs
